

0-10V dimmer sensor
Setting the new standard for 0-10V control

0-10V dimmer sensor

0-10V dimmer for fluorescent and LED fixtures

- Optimized for ideal sensitivity
- Settings are simple to adjust—no dip switches or dials
- Neutral optional—one model has you covered with the option to connect the neutral
- 3-way—works with a Maestro® accessory switch or mechanical switch
- The sensor lens will flash if there is a miswire, or if you're using the wrong type of fixture (requires sourcing fixture)

C·L dimmer sensor for dimmable LEDs/CFLs
Combines a Maestro C·L dimmer with an occupancy or vacancy sensor

C·L dimmer sensor

C·L dimmer controls multiple light bulb types

- Dimmable LED
- Dimmable CFL
- Incandescent/halogen

Sensor dimmer light bulb compatibility

■ = unique LED or CFL bulb model type

**Lutron
 more than 290 bulbs**

**Other company
 61 bulbs**
