Appleton’s single, duplex or 90 degree construction Speedlock connectors ground and secure MC, MCAP, MCI-A, AC and flexible metal conduit to enclosures and boxes in dry locations.

- A 105 °C (221 °F) rated insulated throat provides maximum protection for wire insulation.
- Patented design allows contractors to install them in seconds without the use of tools or locknuts, significantly reducing labor costs
- Easily removable for reuse
- Provides superior pullout protection with no loose component parts
